Online grooming

What is it?

- Grooming involves someone building a relationship with a child and gaining their trust, in preparation for abuse
- Online platforms make it easier for groomers to target several children at once, which can make the grooming process quicker
- After making contact online, a groomer may convince a child to meet in person or persuade them to take part in online sexual activity

Who is at risk?

- Grooming can affect any child, regardless of age, gender, race or socio-economic background
- However, some children are more vulnerable than others
